A SELECTED BIBLIOGRAPHIC RESEARCH GUIDE TO MATERIALS

ON PUBLIC HEALTH AND MEDICAL SOCIOLOGY

by

Prakash C. Sharma, Ph.D.
Department of Sociology
Florence State University

PREFACE

In the intellectual world, the compilation and publication of research bibliography is not generally considered as a scholarly enterprise. In my personal opinion, such works are best judged in terms of their usefulness and service to the research scholars who need them. My primary objective in compiling this selected bibliographic research guide to materials on public health and medical sociology is to achieve that goal.

The present bibliography contains nearly 2,000 citations, including many from the following areas on public health: (1) health in general, (2) medical care, (3) maternal health, (4) child health, (5) dental care, (6) epidemiology, (7) mental health, (8) environments and public health, and (9) rural public health. The references listed in the bibliography are by no means definitive nor are they meant to be, but they represent many of the old and current publications which may be used as guides for further research. The bibliography is divided into two parts: Part One contains the listing of books in that area and Part Two is a listing of articles appearing in the public health periodicals.

The main sources of compilation of the bibliography were local, regional, national, and international journals and/or periodicals and books reporting research findings on the subject matter of public health. Over 350 different periodicals (see appendix) and nearly 800 books were used in preparing this bibliographic guide. To keep the listing to a workable length, I have selected and included only those references appearing between 1945 and 1972. The listings are arranged by the author in alphabetical order, both for the articles in periodicals and also for the books.

A number of persons deserve my thanks for their help with this compilation, without whose cooperation this work would have not been completed. I especially wish to thank my wife, Mrs. Yogesh Sharma, for help in compilation and Mrs. Hershel Marks for typing the bibliography and also for the editorial assistance. The sole responsibility for any errors and/or omissions is mine.

It is my hope that those engaged in various aspects of public health and medical sociology research will find this guide a useful and informative instrument.

PART ONE: LISTING OF BOOKS

- Abbatt, John C., et. al. Protection Against Radiation. Illinois: Thomas. 235 pp., 1961.
- Acheson, Roy M., editor. Comparability in International Epidemiology. New York: Milbank Memorial Fund. 427 pp., 1965.
- Ackerknecht, E. H. A Short History of Psychiatry. London: Hafner. 1959.
- Alan, McLean, editor. Mental Health and Work Organizations. Chicago: Rand McNally and Company. 322 pp., 1970.
- Alexander, F. Psychosomatic Medicine: Its Principles and Applications. New York: W. W. Norton and Company. 1950.
- Allen, Arthur C. The Skin. St. Louis, Missouri: Mosby. 1048 pp., 1954.
- Almy, Millie. Child Development. New York: Holt. 490 pp., 1955.
